

AIChE – Chicago Symposium 2006

Refinery Processing and In-Plant Energy Conservation and Optimization

Call for Vendor Poster Abstracts **Day 1, Energy Conservation**

A two-day symposium on energy conservation and new refinery technology will be presented October 9 - 10, 2006 at the Illinois Institute of Technology in Chicago, IL. The purpose of this event is to focus on real world technical advances in two areas. The first day will focus on plant energy improvements of general interest to the chemical processing industry and the second day will focus on advances in refining technology. This notice is intended for the first day plant energy conservation approaches.

DEADLINE FOR ABSTRACT SUBMISSION:
September 15, 2006 (simple presentation statement)

Day 1 Energy Conservation Needs

Vendor posters are sought that describe equipment and services related to energy reduction including process upgrades and revamps where Return On Investment (ROI) from energy is significant. The following areas are taken from the Department of Energy Technology Innovation Program and are suggestive, but not limiting.

- Steam
- Process Heating
- Motors, Pumps and Fans
- Compressed Air
- General Process Improvements
- Advances in On-Site Power Generation
 - Combined Heat and Power
- Building and Facility Energy Engineering
- Ethanol E85 Fuel

Posters should be technical in content.
